

1. Read the passage given below and answer the questions that follows: (5)

Bees live in a house that is called a hive. There are three kinds of bees: workers, drones, and queens. Only one queen bee can live in each hive. If she is lost or dead, the other bees will stop their work. Bees are very wise and busy little creatures. They all join together to build cells of wax for their honey. Each bee takes its proper place and does its own work. Some go out and gather honey from the flowers; others stay at home and work inside the hive. The cells are not round and have six sides. It is not safe for children to handle bees. Bees have a painful sting that they use in their defense.

- a. Which are the three kinds of bees?
- b. What happens if the queen bee is dead?
- c. Describe the cell?
- d. Why is it not safe for children to handle bees?
- e. Find two adjectives used for the bee from the passage.
